The metal shelf is tilting a lot. Could you move a few of the heavier things to the lower shelf?

Select

The shelf was improperly built, and is almost impossible to not get to tilt.

When it's in my room like it should be, it's against the wall, so it doesn't matter.

Good job on the sets dude....if you glance at it it actually look like the game sets (except for the cow...i am sure snake wasn't a white obese animal). But a decent job on the sets...kudos..loking forward to the movie, ok not really but would like to see it when done
